

## **Course: Strabismus Case Studies**

An expert panel will present diverse strabismus cases that together highlight the core issues common to all strabismus and present pearls and pitfalls in this area. The aim is to use the cases to provide the general ophthalmologist with an approach to the patient with strabismus that will hopefully not just make strabismus patients seem less daunting but also arm them with key diagnostic and treatment skills.

Panel Participants: Prof Frank Martin, Dr Shuan Dai, Trent Sandercoe, Mr Ross Fitzsimons, Dr John Dickson
